In view of applicant's arguments following final office action is necessitated. The rejections of record are not overcome and are incorporated here by reference.

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1, 3, 5, 11, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over SCHWIND (US 5,880,235) in view of MOORMAN (US 5,319,014).

The discussion of the disclosure of SCHWIND in view of MOORMAN in paragraph 1 of the office action mailed on 5/12/2004 is incorporated here by reference.

In the response dated 6/4/2004 the applicants argued following:

- a) One of ordinary skill in the art would not think of adding the filler of MOORMAN into the composition of SCHWIND, since the goal of the SCHWIND is to provide clear article. The amount of the filler in MOORMAN would not result in the article required by SCHWIND.

With respect to the above argument, clear article is one of the goals to be achieved by SCHWIND, but it is not the only one. The prior art of SCHWIND clearly discloses

Art Unit: 1714

that one of the goals of his disclosure it to obtain a dimensionally stable composition to be used for molding without indication of clarity of the molding composition. Therefore, it is examiner's position, that utilizing fillers in the molding composition is a common practice known to those skilled in the art. The clarity of the composition of SCHWIND is required when making a cast glass and not molding article.

3. With respect to the anti-microbial properties of the polymer of SCHWIND such would be evident, since the property results in presence of functional groups not affected by polymerization (C=O and C-O-C).

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1, 3, 5, 11, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 43 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the amendment filed on 6/4/2004 the applicants also removed from the scope of the invention the definition of R3 and R4, which further renders claims indefinite. In

Art Unit: 1714

addition it is not exactly clear which lactone polymer the applicants are claiming since the claim language shows \square -lactones.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
